

Ningbo Uniprint Digital Technology Co., Ltd.

After Print

Design size 50*25cm

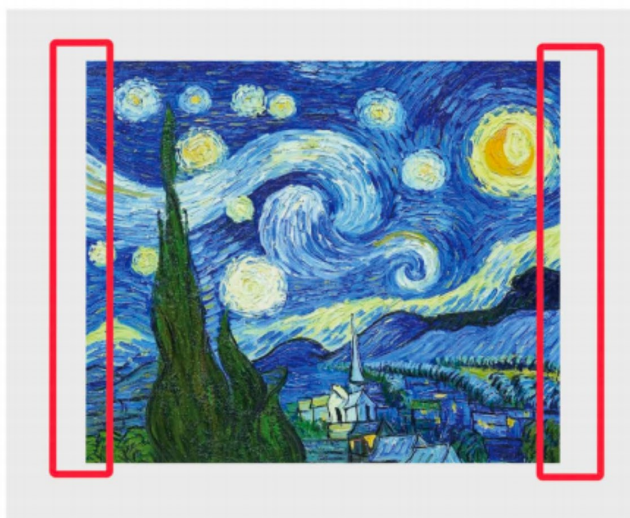

seamless prints
on socks' back

Left and right to be jointed perfectly so printing can be seamless

There's one case if the design image is not a continuous one. it will show a sharp/obvious line on the back.

it's not a big matter if customers accept this situation. but if try to make left and right continuously, then you will have a perfect joint on the backside. which we call it totally seamless design printing

**360 PRINTED SOCKS
WITH IMPERFECT
JOINT**
